

# What we did...

## MENTOR SUPPORT

The Nemours Summer Research Program would not be able to provide students with an excellent experience without the help and dedication of mentors.

Consistently, students praised their mentors for being such a pivotal part of their Nemours experience.

## PROGRAM ACTIVITIES

The Nemours Summer Research Program aims to create a curricular experience that engages deeply, challenges intentionally, and offers a wide breadth of exploration for students. Through engaging discussions during weekly Journal Club, the Career/Alumni Panel, and impressive poster presentations, students truly went above and beyond.

## NSURP SCHOLAR AWARD

Post program, many students go on to present their research at major conferences and specialty meetings. The Nemours Summer Undergraduate Research Program (NSURP) Scholar Award recognizes excellence in research by student investigators based on the quality of abstracts accepted/presented at prestigious national scientific meetings.
